Projects

Healthray DR For Doctors

Healthray DR: Cloud-based medical app streamlining practice management, patient engagement, and borderless healthcare, boosting efficiency and revenue for doctors worldwide.

GUVNL Meter Reader App

The dedicated meter reader diligently visits both residential homes and industrial facilities, meticulously recording consumption data to generate accurate bills. With a keen eye for detail, they promptly address any discrepancies, ensuring transparency and fairness in the billing process. Utilizing advanced synchronization techniques, they guarantee the seamless integration of billing information, enhancing efficiency and reliability for all customers.

Toppscholars - smart learning app for students

This app brings you a personalized learning experience covering all the subjects from classes KG to 12. The App provides comprehensive learning through a wide range of video lessons. Toppscholars is an independent learning platform that caters to the interests of all age groups- KG, Grades 1-4, 5-8 & 9-12 and engages them in the learning process. The learning material is mapped to the NCERT Syllabus and is suitable for CBSE, ICSE, and Maharashtra State Board.

Personal Work Shift Schedule & Calendar

Personal Work Shift Schedule & Calendar app is a personal work calendar plan to help shift workers stay on track with their busy work schedule. Create up to 10 calendars, which can allow use for multiple shifts, multiple jobs, friends, and family or to add coworkers' schedules.

Jani King Cleaning Services

Jani-King is a franchise-based commercial cleaning service management platform that enables organizations to manage customer accounts, assign franchises to service locations, schedule and track cleaning services, and generate operational reports. The system streamlines communication between customers, franchise owners, and administrators while ensuring efficient service delivery, contract management, and business operations.

Tailor Measurement Admin Panel

Tailor Measurement Admin Panel is a web-based management system designed to streamline customer measurement records, order tracking, and tailoring operations. The platform enables administrators to manage customer profiles, store detailed body measurements, monitor order progress, and maintain tailoring records efficiently. It helps reduce manual work, improve measurement accuracy, and enhance overall workflow management.
